SUMMARY

AI creative technologist who builds and runs production video pipelines for e-commerce brands. I lead Quinn's AI video work: **100+ Meta ads for Neeman's at 4.1× average ROAS** and **150+ catalog videos for Mufti** from one Seedance pipeline. Nearly five years at Quinn, a video-commerce SaaS serving 100+ D2C brands.

EXPERIENCE

Quinn Care Pvt Ltd — TechOps Engineer / Customer Success Dec 2021 – Present

Shoppable video and AI content SaaS for D2C e-commerce brands

AI VIDEO & AUTOMATION

- Lead Quinn's AI video team, delivering ad and catalog video for U.S. Polo Assn., Mufti and Neeman's; own planning, production operations and quality control for every delivery.
- Built Neeman's Meta ad creative pipeline: **100+ AI product videos at 4.1× average ROAS**; the top creative reached **6.9× ROAS on ₹80K spend**.
- Built Quinn's Seedance catalog video pipeline (image selection → catalog prompts), live in the internal portal; generated **150+ SKU product-page videos for Mufti**.
- Packaged 4 reusable Claude skills for reference-ad breakdown, Seedream first frames, ad replication and UGC production, replacing one-off prompt writing with a repeatable workflow.
- Produced 9:16 performance ads for Clone, Quinn's AI garment-video app, mixing real app output with AI-generated b-roll.

CUSTOMER SUCCESS

- Onboarded and managed **100+ D2C brands** (boAt, Emma Sleep, Bella Vita, Neeman's, Renee): scoped requirements, coordinated engineering builds and shipped to live Shopify storefronts.
- Used client CVR, landing-page session and order data to recommend video placements and features for Quinn's shoppable video product.

GROWTH & PRODUCT

- Core ops team member as Quinn grew from pre-revenue to break-even (**~$28K MRR**) over 3 years.
- Turned client requests into product decisions: designed features in Figma and Framer and wrote the prioritised specs engineering built from.

Polfrost Aircon Pvt. Ltd. — MEP Design Engineer Sep 2020 – Sep 2021

- Built Revit and AutoCAD 3D MEP models for high-rise residential projects (Hiranandani, Ocean Star), Mumbai.

SELECTED PROJECTS

ComfyUI catalog image generator Oct 2026

110-node graph on Comfy Cloud: one flat lay in, five on-model catalog shots out per run (Nano Banana Pro, DWPose pose control).

Portfolio with process films Oct 2026

Built with Claude: a scroll-driven site whose process videos are animated in code from the real workflow files.

Desktop app rebuilds, to learn native engineering · github.com/PallaDian17 Oct 2026

Rebuilt two utilities with Claude Code: a screen-aware macOS menubar voice assistant (HeyClicky) and a Windows file shelf in C#/.NET (Dropover).

SKILLS

AI video & image:	Seedance 2.5, Seedream, Kling, Wan, Higgsfield, GPT Image, Nano Banana Pro, fal.ai API
Workflows:	ComfyUI, Claude Code, Claude skills and MCP integrations
Technical & design:	Python (Pillow, OpenCV), FFmpeg, REST APIs, Shopify, Figma, Framer
Data:	Meta Ads performance (ROAS), Shopify analytics, funnel / CVR analysis

EDUCATION & LANGUAGES

B.E. Mechanical Engineering — Sinhgad Institutes, Pune | **Languages:** English (professional), Malayalam, Marathi
